Start
600
Display user interface with navigation controls and a panel
602
Receive change in data on the panel from a user
604
Receive input from the user changing the setting of the navigation controls
606
Display user interface with a new panel corresponding to the setting of the navigation controls
608
Receive user input requesting access to information on the earlier panel
610
Display earlier panel using a setting of the navigation controls that leaves more of the navigation controls unchanged from the first setting
612
End
